Civil Design Manager

Description

We Are Hiring: Civil Design Manager

Are you an experienced Civil Engineer with a passion for foundation design, technical specifications, and pile designing for solar structures? If so, we'd love to hear from you.

Responsibilities

- Lead and manage the civil design team for timely project completion
- Develop foundation designs for solar installations and other structures
- Prepare and ensure compliance with technical specifications
- Optimize pile foundations based on soil conditions and load requirements
- Generate detailed BOM and cost estimates
- Collaborate with architects, engineers, and other stakeholders
- Conduct site visits and resolve technical issues

Qualifications

- Bachelor's degree in Civil Engineering (Master's preferred)
- Strong technical skills in relevant software
- Proven expertise in civil design, particularly in solar structures
